

Analyst Role 1 – technical focus

Who is Timera Energy?

- Timera Energy is a specialist energy consultancy that provides expert advice on value and risk in power, gas & LNG markets
- We believe flexibility lies at the core of the energy transition and we are experts in the analysis, valuation & optimisation of flexibility
- We have evolved rapidly since 2011 to become one of Europe's most respected energy consultancies, with a strong client base of investors & owners of flexible energy assets

Who are we looking for?

- We are looking for an analyst with strong technical skills to join our growing team.
- You will have two key areas of responsibility:
 - take ownership for analysis and delivery of pieces of client projects - this will involve working in project teams and engaging with clients to deliver rigorous analysis and practical solutions to complex problems
 - work with the Head of Analytics and other members of our analytical team to develop and maintain our suite of inhouse models
- You will have:
 - Strong analytical background, numerical and data management skills
 - Strong coding experience (e.g. Python, VBA, R, Matlab)
 - Energy industry or financial markets experience
 - Strong verbal/written communication skills
 - Practical working knowledge of power and gas markets and associated data
 - 1 - 5 years work experience in a commercial, risk &/or consultancy role
 - Numerate degree (e.g. finance, engineering, economics, maths, operations research or a related analytical field)
 - Current eligibility to work in UK
- Other attributes which are a benefit:
 - Database experience (e.g. SQL, database build and maintenance)
 - Specific European gas, power & LNG market knowledge
 - Experience working with energy market & asset optimisation models
 - Knowledge of European languages
 - Experience of working with source control (e.g. GitHub)
 - Cloud (e.g. AWS) computing experience

What are we offering at Timera?

- We offer very competitive packages as well as the ability to directly participate in company value upside
- We offer significantly more flexibility and autonomy than other companies. This covers e.g. location, work hours & remuneration structure
- Timera has an open, innovative & entrepreneurial environment and we work on a variety of stimulating analytical challenges across the rapidly evolving energy industry
