

Senior Analyst Role

Who is Timera Energy?

- Timera Energy is a specialist energy consultancy that provides expert advice on value and risk in power, gas & LNG markets
- We believe flexibility lies at the core of the energy transition and we are experts in the analysis, valuation & optimisation of flexibility
- We have evolved rapidly since 2011 to become one of Europe's most respected energy consultancies, with a strong client base of investors & owners of flexible energy assets

Who are we looking for?

- We are looking for a Senior Analyst with strong commercial & analytical skills to join our growing team
- You will have responsibility for the delivery of client work, managing smaller project teams and helping to build client relationships, as well as proactively supporting business and team development
- You will take ownership for:
 - defining practical solutions to complex problems
 - proactively developing Timera's knowledge base and analytical capability
 - collaborating with team members to deliver rigorous analysis to clients
 - managing & mentoring more junior members of the analyst team
- You will have:
 - Strong analytical background, numerical and data management skills
 - Energy industry or financial markets experience
 - Strong verbal/written communication skills
 - Practical working knowledge of power and gas markets and associated data
 - 4 - 10 years work experience in a commercial, analyst, risk &/or consultancy role
 - Numerate degree (e.g. finance, engineering, economics, maths, operations research or a related analytical field)
 - Currently eligibility to work in UK (the role is London based)
- Other attributes which are a benefit:
 - Specific European gas, power & LNG market knowledge
 - Commercial energy experience e.g. from within energy companies, utilities
 - Experience working with energy market & asset optimisation models
 - Coding experience (e.g. Python, VBA, R)
 - Database experience (e.g. SQL, database build and maintenance)
 - Knowledge of European languages

What are we offering at Timera?

- We offer very competitive packages as well as the ability to directly participate in company value upside
- We offer significantly more flexibility and autonomy than other companies. This covers e.g. location, work hours & remuneration structure
- Timera has an open, innovative & entrepreneurial environment and we work on a variety of stimulating analytical challenges across the rapidly evolving energy industry
